PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience in backend development and cloud architecture. Passionate about building high-performance microservices using Python and Go.

WORK EXPERIENCE

Software Engineer | Apex Systems | 2021-06 to Present
• Architected RESTful microservices in FastAPI and PostgreSQL.
• Integrated Redis cache layers cutting response times by 40%.
• Automated CI/CD deployments using Docker and GitHub Actions.

Junior Developer | CodeCraft Studio | 2020-01 to 2021-05
• Maintained Django REST APIs and PostgreSQL schemas.
• Developed responsive user interfaces using React and TypeScript.

EDUCATION

Bachelor of Science in Computer Science | 2016 - 2020
University of Texas at Austin

TECHNICAL SKILLS

• Languages: Python, Go, TypeScript, SQL, JavaScript
• Frameworks: FastAPI, Django, React, Next.js
• Databases: PostgreSQL, SQLite, Redis
• Tools & Cloud: Docker, Kubernetes, AWS, Git, Linux

PROJECTS

StreamSync | Python, WebSockets | https://github.com/alexmercer/streamsync
Real-time data streaming server handling 20k concurrent WebSocket connections.

CERTIFICATIONS

• AWS Certified Solutions Architect (2022)
